Marine Protected Area (MPA) Watch
Regional Report from Beach Watch
Mendocino, Sonoma, Marin, San Francisco, and San Mateo Counties
January 1, 2022 – December 31, 2022

mpawatch.org  klindquist@farallones.org  https://farallones.org/
**Background**

MPA Watch is a statewide collaborative effort to collect critical human use data to enhance the management and conservation of marine protected areas (MPAs). MPA Watch data informs the management, enforcement, and science of California's MPAs and allows us insight on how human uses are changing as a result of MPA implementation. By involving local communities in this important work, MPA Watch programs inspire and empower stewardship, and educate California communities about ocean ecosystems. MPA Watch trains volunteers to observe and collect unbiased data on coastal and marine resource use. The North-central Coast Marine Protected Area (MPA) Watch Program, organized by Greater Farallones Association’s Beach Watch program, engages 150 community scientists in 10 MPAs, spanning 5 counties.

**January 1, 2022 – December 31, 2022 Highlights**

- The human activity surge observed at all sites during the pandemic seems to have leveled off in 2022.
- Shore-based recreational activities account for 94% of observed activities. Shore-based consumptive activities account for 1% of observed activities. Offshore consumptive activities account for 2% of observed activities.
- Tidepooling is notably decreased due to access closures at Fitzgerald Marine Reserve due to the pandemic in early 2022.
- Potential MPA violations have increased in several MPAs: Del Mar Landing, Stewarts Point, and Bodega Head primarily driven by boat based activities.
Human Use of MPAs January - December 2022
Overview

Top 10 MPAs by All Activity
January 1, 2022 – December 31, 2022
4,002 total activity events

- Sea Lion Cove SMCA 306 (8%)
- Del Mar Landing SMR 300 (7%)
- Stewarts Point SMR 100 (2%)
- Russian River SMCA 464 (12%)
- Russian River SMRMA 391 (10%)
- Bodega Head SMR 1,002 (25%)
- Estero de Limantour SMR 177 (4%)
- Point Reyes SMR 410 (10%)
- Montara SMR ▲ 1/2 ▼

All MPAs Combined
January 1, 2022 – December 31, 2022
4,002 activity events

- On-Shore Nonconsumptive 3,766 (94%)
- On-Shore Consumptive 27 (1%)
- Off-Shore Nonconsumptive 121 (3%)
- Off-Shore Consumptive 88 (2%)

Activity Classifications

On-Shore - Activities that take place on a sandy or rocky beach. Excludes bluffs, trails, sea walls, parking lots, or other man-made structures. Includes recreation, tidepooling, shore-based fishing, etc.

Off-Shore - Activities that take place offshore, typically in knee-deep water or deeper. Includes surfing, SCUBA diving, kayaking, boat fishing, etc.

Consumptive - An activity in which a natural resource (i.e. fish, kelp, shells) is being collected.

Non-Consumptive - An activity in which a natural resource is not collected.
Activity by MPA

Sea Lion Cove SMCA
January 1, 2022 – December 31, 2022
506 activity events
- On-shore Nonconsumptive: 279 (55%)
- On-shore Consumptive: 20 (7%)
- Off-shore Nonconsumptive: 4 (1%)
- Off-shore Consumptive: 5 (1%)

Del Mar Landing SMR
January 1, 2022 – December 31, 2022
300 activity events
- On-shore Nonconsumptive: 300 (100%)
- On-shore Consumptive: 0 (<1%)
- Off-shore Nonconsumptive: 0 (<1%)
- Off-shore Consumptive: 0 (<1%)

Stewarts Point SMR
January 1, 2022 – December 31, 2022
100 activity events
- On-shore Nonconsumptive: 42 (42%)
- On-shore Consumptive: 0 (<1%)
- Off-shore Nonconsumptive: 0 (<1%)
- Off-shore Consumptive: 58 (58%)

Russian River SMCA
January 1, 2022 – December 31, 2022
464 activity events
- On-shore Nonconsumptive: 453 (98%)
- On-shore Consumptive: 0 (<1%)
- Off-shore Nonconsumptive: 5 (1%)
- Off-shore Consumptive: 6 (1%)

Russian River SMRMA
January 1, 2022 – December 31, 2022
281 activity events
- On-shore Nonconsumptive: 332 (85%)
- On-shore Consumptive: 1 (<1%)
- Off-shore Nonconsumptive: 58 (15%)
- Off-shore Consumptive: 0 (<1%)

Estero de Limantour SMR
January 1, 2022 – December 31, 2022
177 activity events
- On-shore Nonconsumptive: 169 (95%)
- On-shore Consumptive: 4 (2%)
- Off-shore Nonconsumptive: 3 (2%)
- Off-shore Consumptive: 1 (1%)
Activity Classifications

On-Shore - Activities that take place on a sandy or rocky beach. Excludes bluffs, trails, sea walls, parking lots, or other man-made structures. Includes recreation, tidepooling, shore-based fishing, etc.

Off-Shore - Activities that take place offshore, typically in knee-deep water or deeper. Includes surfing, SCUBA diving, kayaking, boat fishing, etc.

Consumptive - An activity in which a natural resource (i.e. fish, kelp, shells) is being collected.

Non-Consumptive - An activity in which a natural resource is not collected.
Activity Incidence by MPA

The charts below show incidence values for each MPA monitored by Greater Farallones Association Beach Watch program. Incidence is calculated as number of activities recorded divided by total survey-miles.
## Activity Incidence by MPA

### Notes on Calculating Incidence

The baseline rate for the reporting period was calculated by summing the total use count for each category during the same period from each previous year and dividing this value by the transect miles surveyed at each site. The miles surveyed were calculated by first identifying the length of each transect for all the MPAs in question and multiplying the length of the transect by the number of surveys that had been taken along that transect during the same time period. For MPAs with multiple transects, the total distance traveled for each transect within the MPA were summed together to get the total miles surveyed within that MPA.
Breakdown by MPA

Sea Lion Cove State Marine Conservation Area
Between the months of January and December 2022, GFA’s MPA Watch data suggests a rate of 7.7 total uses per mile surveyed in this MPA. This is an 10.5% decrease compared to the January-December 2021 data rate. People observed in the MPA were primarily taking part in non-consumptive activities on-shore, such as beach recreation and wildlife viewing. This accounted for 88% of the activities logged in the MPA Watch surveys. 7% of human use was comprised of onshore consumptive activities and 1% offshore consumptive activities, a 14% increase.

Del Mar Landing State Marine Reserve
Between the months of January and December 2022, GFA’s MPA Watch data suggests a rate of 23.1 total uses per mile surveyed in this MPA. This is an 5% increase compared to the January-December 2021 data rate. People observed in the MPA were taking part in non-consumptive activities onshore, such as beach recreation which accounted for 84% of activities and dogs on leash (16%). No consumptive activities were observed.

Stewarts Point State Marine Reserve
Between the months of January and December 2022, GFA’s MPA Watch data suggests a rate of 20.8 total uses per mile surveyed in this MPA. No comparison is available with 2021 as no data was available. 42% of people observed in the MPA were taking part in non-consumptive activities on-shore, such as beach recreation rocky and wildlife viewing. 58% of human use was comprised of commercial and recreational boat-based line fishing consumptive activities.

Russian River State Marine Conservation Area
Between the months of January and December 2022, GFA’s MPA Watch data suggests a rate of 22.7 total uses per mile surveyed in this MPA. This is an 19.5% decrease compared to the January-December 2021 data rate. 98% of people observed in the MPA were taking part in non-consumptive activities on-shore, such as beach recreation and wildlife viewing. Consumptive activities accounted for 1% of activities observed including boat-based commercial and recreational line fishing.

Russian River State Marine Recreational Management Area
Between the months of January and December 2022, GFA’s MPA Watch data suggests a rate of 56.7 total uses per mile surveyed in this MPA. This is a -15% decrease compared to the January-December 2021 data rate. 99% of people observed in the MPA were taking part in land-based and water-based non-consumptive activities such as beach recreation, wildlife watching, kayaking and standup paddleboarding.
Consumptive activities such as land-based hook and line fishing accounted for less than 1% of activities observed.

**Bodega Head State Marine Reserve**
Between the months of January and December 2022, GFA's MPA Watch data suggests a rate of 29.1 total uses per mile surveyed in this MPA. This is a 67.2% increase compared to the January-December 2021 data rate. People observed in the MPA were primarily taking part in non-consumptive activities onshore recreation, such as beach recreation and wildlife watching. This accounted for almost 98% of the activities logged in the MPA Watch surveys. Consumptive activities such as shore based hook and line fishing and recreational and commercial boat based line fishing accounted for 2% of activities observed.

**Estero de Limantour State Marine Reserve**
Between the months of January and December 2022, GFA's MPA Watch data suggests a rate of 4.3 total uses per mile surveyed in this MPA. This is a 4.9% increase compared to the January-December 2021 data rate. People observed in the MPA were primarily taking part in non-consumptive activities such as beach recreation, wildlife watching, for a combined 95%. 3% of human use was comprised of hook and line fishing and boat based recreational line fishing.

**Point Reyes State Marine Reserve**
Between the months of January and December 2022, GFA's MPA Watch data suggests a rate of 9% total uses per mile surveyed in this MPA. This is a 50% increase compared to the January-December 2021 data rate. People observed in the MPA were primarily taking part in non-consumptive shore-based activities such as beach recreation and wildlife watching. Consumptive activities accounted for less than 1% of activities observed. No potential violations were observed.

**Montara State Marine Reserve**
Between the months of January and December 2022, GFA's MPA Watch data suggests a rate of 17.5 total uses per mile surveyed in this MPA. This is a 33.7% decrease compared to the January-December 2021 data rate. People observed in the MPA were primarily taking part in non-consumptive shore-based activities such as tide pooling (34%), beach recreation and wildlife watching. This accounted for 98% of the activities logged in the MPA Watch surveys. No consumptive activities were observed.

**Año Nuevo State Marine Conservation Area**
Between the months of January and December 2022, GFA's MPA Watch data suggests a rate of 6.3 total uses per mile surveyed in this MPA. This is a 17.1% decrease
compared to the January-December 2021 data rate. People observed in the MPA were
taking part in non-consumptive activities on and off shore such as wildlife watching and
beach recreation, off leash dogs, and surfing. Less than 1% of activities were
consumptive, either shore based or offshore.

### Next Steps

Greater Farallones Association continues to maintain its roughly 150 volunteers through
training new volunteers and continuing education for experienced volunteers. MPA
Watch intends to collaborate with the California Department of Fish and Wildlife (CDFW)
to distribute MPA Watch reports to regional managers in order to improve the
management and enforcement of MPAs. MPA Watch is also looking to expand its
network of partner organizations to enhance the scale and scope of MPA monitoring
across California. MPA Watch will be making our human use data available on our
website to make it accessible to partners, resource agencies, municipalities, and other
interested parties. One of the hopes of MPA Watch is that volunteers and community
members help spread knowledge and awareness of MPAs to the communities that
surround them, inspiring marine stewardship in our populations.
Additional Information
For additional information on MPA Watch, including survey sites, participating organizations, protocols and datasheets, media kit, and how to get involved, please visit mpawatch.org. Connect with MPA Watch on social media @MPAWatchOrg.

For additional information regarding MPAs and regulations specific to the various classifications of MPAs please visit wildlife.ca.gov/MPAs. If you see an activity that violates MPA regulations, please call CalTip to report the violation at (888)-334-2258.

For more information about the work the Greater Farallones Association does to conserve California’s Federal and California MPAs and other conservation projects please visit farallones.org.
